

FREQUENTLY ASKED QUESTIONS

FOR MORE INFORMATION

BUILDING A FENCE

Do I need a permit to build a fence?

Only if you want to build a fence higher than what the Land Use Bylaw allows. (see inside for details.)

What materials can I use to construct my fence?

Wood, brick, stone, concrete, vinyl or metal can be used to build your fence. You can not have a barbwire fence in residential areas. Electrical fences are not permitted anywhere in Town.

Where can I build my fence?

A fence may be built along or up to your property line— and must stay within your property limits.

How do I determine my property lines?

Property lines can be determined from a Real Property Report. The best and most accurate method to locate your property lines is to have an Alberta Land Surveyor stake them out.

If my neighbour is building a fence between our properties, do I have to pay half?

That is a matter between you and your neighbours. Cooperation between neighbours is encouraged.

FENCE REGULATIONS

The Town's Land Use Bylaw allows for most fences to be built without permits. If you want to build a fence higher than 2.0 metres (6.6 feet) in your side or backyard, you will need a development permit.

Corner lots often require special consideration to ensure good visibility for both vehicle and pedestrian traffic. You are encouraged to meet with the Development Officer to discuss your options.

Fences are permitted in all single-family residential Land Use Districts and may be built up to any property line.

FENCE REGULATIONS

Front Yard

Fences in front yards may be a maximum of 1.0 metre above design grade at any point between the front of the house and the property line. (Design grade is the elevation established by the subdivision's engineer to ensure optimal drainage from all properties within the subdivision. Ask at the Planning and Development Department to see your plot plan.) Fences are not allowed on Town owned property.

Rear and Side Yard

Side and rear fences can be built 2.0 metres (6.6 feet) above the Design Grade without a Development Permit. If you want to build a fence that is higher than 1.8 metres, you will need a Development Permit.

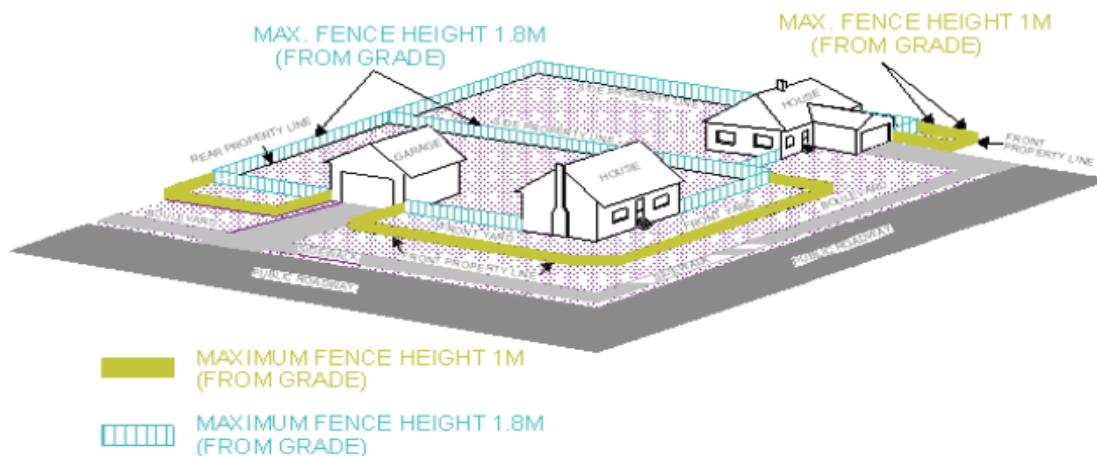

APPLYING FOR A PERMIT

For more information on Development and Building permits, check the brochure entitled "Applying for Permits", available at the Town Office or on the Town's website www.foxcreek.ca

Utility Right of Way

A utility right of way is a registered easement on private land that allows the Town and Utility Companies the right to access the utilities or services that are buried within the right of way. Permanent structures are not permitted to be built within a utility right of way.

For detailed information, contact the Planning and Development Department at 780.622.3896.
