SAMPLING INSTRUCTIONS

Please read instructions thoroughly.

1. Use a kitchen cold-water faucet for sampling. Do not remove the aerator (screen) prior to sampling.
2. If you have a whole-home water treatment device, such as a water softener, collect your sample from a faucet tap that is not fed from the treatment device (if possible). If the kitchen faucet has a faucet-mounted filter, use another faucet that is also used for drinking water, or remove the filter.
3. Place the opened sample bottle below the faucet and open the cold-water tap as you would do to fill a glass of water. Fill the sample bottle and turn off the water.
4. Tightly cap the sample bottle and place in the sample kit provided. Please review the sample kit label at this time to ensure that all information contained on the label is correct.
5. If your sample was collected from a tap with a water softener or filter, note this as well.
6. Place the sample kit on your doorstep and call the on-duty operator at 622-7629 so that a Water Utility staff member may pick up the sample kit.
7. Results from this monitoring effort and information about lead will be provided to you as soon as practicable but no later than 14-days after the system learns of the tap monitoring results.

Call Utilities Operator at 780-622-7629 if you have any questions regarding these instructions.

TO BE COMPLETED BY RESIDENT

Date of sample collection: _____

Time of sample collection: _____ : _____ AM/PM

Sample location & faucet (e.g. kitchen sink): _____

Is water filtered or treated by an in-home device (circle answer)? YES / NO _____

I have read the above directions and have taken a tap sample in accordance with these directions.

To the customer:

The personal information you provide is being collected under the authority of the Environmental Protection and Enhancement Act, Potable Water Regulation 16(1) for the sole purpose of conducting the waterworks system lead survey of tap water. Please note that your tap water sample results and your address will be disclosed to Alberta Environment and Parks as part of required reporting under this program. Your personal information will not be shared further unless you provide additional consent to do so. By providing your tap water sample and personal information, you are consenting to this collection, use and disclosure.
